Fort Collins, Colorado, United States

- \* Managed multiple teams of 1-5 consultants from initial strategic assessment to software delivery
- \* Developed and presented a training module for the 200+ person company on time management best practices
- \* Signed over \$500,000 in new work and contract extensions to new and existing clients to expand our company portfolio
- \* Spearheaded a collaborative effort to standardize our internal document storage system and update our project documentation, reducing our template system by a factor of 3

## Nead Werx, Inc.

5 years 1 month

### Product Manager (Account Engineer)

January 2019 - May 2021 (2 years 5 months)

Greater Atlanta Area

- Designed dozens of statements of work from the ground up, from the earliest design phases all the way through user testing and final deliverables
- Started a shadowing initiative with a client to capture feedback from end users who otherwise had little voice in product priorities
- Implemented demos to three Fortune 500 companies to support our sales team in product adoption
- Delivered an outage plan to communicate with end users and increase product confidence, which reduced our support ticket intake by 90% during times of site instability
- Served as the liaison to multiple retail clients to ensure a consistent and reliable user experience

## Middleware Co-op

May 2016 - January 2019 (2 years 9 months)

Greater Atlanta Area

- Worked as a middleware engineer working with production code for a variety of retail clients
- Led two client requested projects that spanned our entire code stack
- Assisted other engineers with bug duty to quash dozens of issues that arose on the production site
- Planned and executed an enterprise cyber security education initiative and exercise

## Georgia Tech

### Cyber Security Assistant

January 2016 - November 2016 (11 months)

Greater Atlanta Area

- » Evaluated emerging security risks to campus and drafted reports on combat and prevention
- » Dealt with daily threats to the network to isolate and contain infected systems
- » Worked to expand and plan the campus wide switch to Duo Factor authentication
- » Learned about computer forensic techniques for combating cyber crime
